Military Urine Collection Flow Chart

Soldier provides ID card to UPL and UPL confirms Soldier’s identity

↓

If not already removed the Soldier removes excess outer garment

↓

UPL removes new bottle from the specimen box & places ID card in the appropriate slot that matches Soldier’s specimen number

↓

UPL hands specimen bottle and wide-mouth cup to Soldier

↓

Soldier and observer move to latrine, keeping bottles in full view of observer

↓

In latrine, Soldier washes hands with WATER ONLY

↓

Soldier collects specimen in wide-mouth cup in full view of observer

↓

Observer must see urine leaving Soldier’s body and entering wide-mouth cup

↓

Soldiers pours urine from wide-mouth cup into specimen bottle in full view of observer

↓

Soldier recaps specimen bottle in full view of observer

↓

After bottle is capped, Soldier **will** wash and dry hands, keeping bottle in full view of observer

↓

Soldier will ensure the specimen bottle is dry and discard any urine left in the wide mouth cup

↓

Soldier hands specimen bottle to UPL or places bottle on UPL collection table as directed by the UPL

↓

UPL verifies cap is tight, bottle dry, looks for signs of adulteration, and ensures volume of urine is greater than 30 mL, **then place it back on the collection table**

↓

Observer signs testing register first and then the Soldier signs testing register

↓

UPL returns ID card to the Soldier
