INTELLIGENCE
(Changed 30 Apr 21)

1. Specialty Summary. Leads and performs intelligence activities across the full range of military operations supporting the Air Force’s Service Core Function (SCF) of Global Integrated Intelligence, Surveillance and Reconnaissance (ISR). The Air Force conducts global integrated ISR operations through a five-phase process commonly known by its acronym, PCPAD: planning and direction; collection; processing and exploitation; analysis and production; and dissemination. Additionally, ISR professionals conduct assessment, evaluation, and feedback throughout each phase. Air Force intelligence officers lead Airmen through the PCPAD process across four main areas, also known as functional competencies: Analysis, Collection, Targeting, and Sensing Grid Activities. To execute these functional competencies intelligence officers utilize subject matter expertise in the six intelligence disciplines of geospatial intelligence (GEOINT), human intelligence (HUMINT), measurement and signature intelligence (MASINT), open source intelligence (OSINT), signals intelligence (SIGINT), and technical intelligence (TECHINT); utilize professional tradecraft to include assessment, counterdrug, counter proliferation, counterterrorism, current intelligence, general military intelligence, indications and warning, irregular warfare and target intelligence; and integrate thoroughly within cross functional capabilities, missions, and organizations to include airborne ISR, the Air Operations Center (AOC), the Air Support Operations Center (ASOC), cyberspace ISR, the Distributed Common Ground Station (DCGS), flying unit level support, force protection, information operations, space, and special operations forces (SOF). Finally, intelligence officers perform ISR enterprise management/staff functions to include acquisition, career broadening, doctrine, education and training, financial management, human capital/talent management, information technology, modeling and simulation, policy, research and technology, security, and strategy. Related DoD Occupational Group: 230100.

2. Duties and Responsibilities:
2.1. Directs intelligence activities. Directs ISR activities and organizations, and establishes goals and objectives. Reviews requirements for objectives and relative priorities. Serves as the commander’s senior intelligence advisor. Directs preparation of intelligence budget estimates and financial plans. Implements standardization, evaluation, and training programs, and monitors compliance.
2.2. Develops intelligence plans and policies. Evaluates impact of legislative action, executive orders, regulations, directives, and management decisions. Integrates intelligence activities into plans and programs. Develops and implements intelligence operations and applications policies, plans, concepts, systems, and orders for the intelligence disciplines, professional tradecraft, and integration with cross functional capabilities. Conducts force development, management and structure planning.
2.3. Manages and coordinates intelligence activities. Confers with government, business, professional, scientific, and other nations’ organizations to provide support, exchange ideas, participate in studies, and coordinate on proposals and findings. Manages intelligence responsibilities of the Department of Defense Planning, Programming, and Budgeting System. Coordinates with personnel, materiel, planning, programming, and operational functions on allocation of resources, availability of funds, and preparation and implementation of operational plans. Supports weapon system acquisition.
2.4. Produces timely and accurate fused intelligence analysis. Uses structured analytical techniques to convert processed information into finished intelligence through the integration, evaluation, analysis, and interpretation of all-source data and the preparation of intelligence products in support of known or anticipated user requirements. Produces intelligence from the information gathered by the collection capabilities assigned or attached to the joint force and from the refinement and compilation of intelligence received from subordinate units and external organizations. Integrates, evaluates, analyzes, and interprets all processed information to create products that will satisfy the commander’s priority intelligence requirements (PIRs) and requests for information (RFIs).
2.5. Conducts collection and ISR operations. Executes collection management by converting intelligence requirements into collection requirements, establishing priorities, tasking or coordinating with appropriate collection sources or agencies, monitoring results, and re-tasking, as required. Conducts collection operations by directing, scheduling, and controlling specific collection platforms, sensors and HUMINT sources to include the physical operation of airborne systems (both manned and remotely piloted), space-based systems, cyber, non-traditional ISR and HUMINT sources as well as near real time (NRT) coordination and control. Performs processing, exploitation, and dissemination by converting raw collection into forms that can be readily used by commanders, decision makers at all levels, intelligence analysts and other consumers.
2.6. Employs multi-domain sensing grid activities. Performs activities such as collection operations (sensing), analysis (identify and attribute), delivering information to customers, and collaborating with partners (sharing). Understands cloud technology, machine intelligence, and big data analytics combined with critical thinking skills to accelerate intelligence activities in a fast-paced, data-intensive environment where Airmen act as both producers and consumers of information. Understands how to operate within a collaborative sensing grid and use a common data environment to enable human-machine teaming and empower ISR Airmen to be more effective in solving problems and delivering time-dominant intelligence.
2.7. Performs targeting functions. Performs targeting functions to include kinetic and non-kinetic target development, weaponeering, precision point mensuration (PPM), force application, execution planning, and combat assessment.
